YASH RAJENDRA PATIL

Maharashtra, India +91 9359307313 yashrspatil7313@gmail.com LinkedIn GitHub

PROFESSIONAL SUMMARY

Aspiring Data Engineer and Computer Science & Design undergraduate with strong foundations in SQL, Python, Data Warehousing, and Big Data technologies. Hands-on experience in building ETL pipelines, implementing incremental data loading processes, designing relational database schemas, and processing large datasets using Apache Spark and Spark SQL. Passionate about developing scalable data solutions and leveraging data engineering principles to solve real-world business problems.

EDUCATION

Degree / Certificate	Status / Score	Year
Bachelor of Engineering (B.E.) – Computer Science & Design	Pursuing	2023 – 2027
Higher Secondary Certificate (HSC)	Percentage: 58.17%	2021 – 2022
Secondary School Certificate (SSC)	Percentage: 76.60%	2019 – 2020

PROJECTS PORTFOLIO

Online Book Store – SQL Project

Relational Database & Analytics

- Designed and implemented a relational SQL database to manage books, customers, and order transactions efficiently.
- Generated insights on sales, revenue, customer behavior, and top-performing books.
- Demonstrated strong understanding of relational database design, data integrity, and query optimization concepts.
- Performed data analysis using SELECT, WHERE, JOINs, GROUP BY, HAVING, aggregate functions, and subqueries.

PrintHub — Online Xerox Printing Platform

Major Full Stack Project

Tech Stack: React, TypeScript, Node.js, Express.js, Prisma, PostgreSQL/SQLite, JWT, Razorpay, SSE

- Full-stack online printing platform that enables users to upload documents, customize print settings, select print shops, make payments, and track orders digitally.
- Implemented secure authentication with JWT, bcrypt, email OTP verification, and role-based customer/shopkeeper access.
- Built a document upload and print configuration system supporting bulk uploads, page detection, B&W/Color, Duplex, copies, paper size, orientation, and real-time price calculation.

TECHNICAL SKILLS

Programming Languages:	Python, SQL
Big Data Technologies:	Apache Spark, Spark SQL
Databases:	MySQL, PostgreSQL, MongoDB
Data Engineering:	ETL Pipelines, Incremental Loading, Data Warehousing, Star Schema, Data Modeling, Batch Processing
Data Analysis:	Pandas, NumPy, Matplotlib, Power BI
Tools & Environments:	Git, GitHub, Jupyter Notebook, VS Code
Core Concepts:	Relational Database Design, SQL Querying, Data Processing, Data Analysis

CERTIFICATIONS

- Oracle Agentic AI Certified Foundations Associate
- Software Testing Techniques
- 30-Days SQL Micro Course
- Python Programming Certification
- SQL Intermediate Certification
